ENGINEERING • TECHNOLOGY • INNOVATION

ABOUT US “

VIS is an engineering and technology solutions provider delivering integrated services across MEP, Low Current Systems, ICT Infrastructure, Smart Buildings and Digital Transformation.

We support developers, contractors, consultants, private organizations and government entities through the successful delivery of engineering and technology projects.

Our multidisciplinary expertise allows us to provide complete project lifecycle solutions-from planning and design to implementation, commissioning and long-term support.

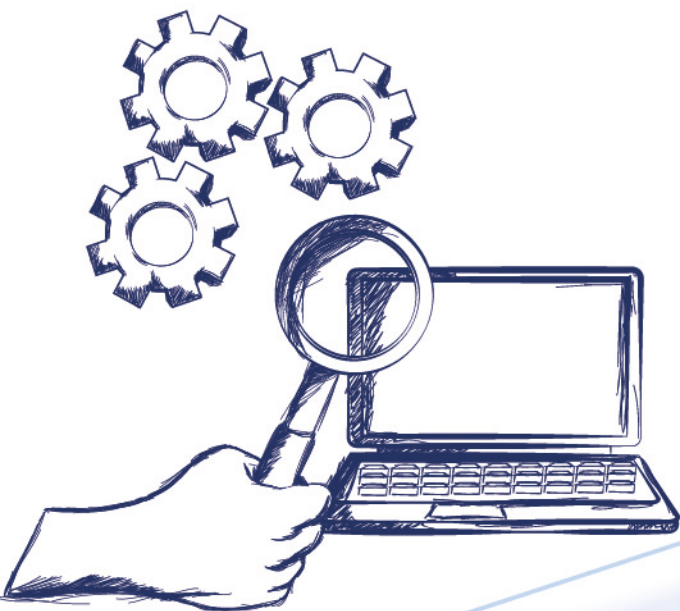

At **VIS**, we believe that successful projects are built on quality, commitment, technical excellence and strong client relationships.

OUR APPROACH

- ✓ Understand Client Requirements
- ✓ Deliver Practical Solutions
- ✓ Execute With Precision
- ✓ Ensure Quality & Safety
- ✓ Provide Long-Term Support

OUR “ SERVICES

ENGINEERING SOLUTIONS

Providing reliable engineering systems that support modern buildings and critical facilities.

TECHNOLOGY SOLUTIONS

Delivering advanced digital infrastructure and smart technologies.

PROJECT DELIVERY

Managing projects from concept to completion with quality & efficiency.

OPERATIONS & MAINTENANCE

Supporting facilities with preventive and corrective maintenance services.

DIGITAL TRANSFORMATION

Helping organizations improve performance through technology and automation.

ELECTRICAL SYSTEMS

Reliable Power Infrastructure for Modern facilities.

Our electrical solutions are designed to ensure safety, reliability, efficiency and uninterrupted operation.

Power Distribution Systems

Medium Voltage Networks

- ✓ Safe and reliable power distribution for large facilities.

Low Voltage Networks

- ✓ Efficient electrical distribution for buildings and infrastructure.

Main Distribution Boards

- ✓ Centralized power management and control.

Sub Distribution Boards

- ✓ Reliable electrical distribution across facility zones.

Busbar Systems

- ✓ Efficient power transfer with reduced losses.

Motor Control Centers

- ✓ Advanced control for mechanical and industrial equipment.

Backup Power Solutions.

Generators

- ✓ Continuous power during outages.

ATS Systems

- ✓ Automatic transfer between utility and backup power.

UPS Systems

- ✓ Critical power protection for sensitive equipment.

Lighting Solutions

Internal Lighting

- ✓ Efficient and comfortable indoor environments.

External Lighting

- ✓ Improved safety and visibility outdoors.

Landscape Lighting

- ✓ Enhancing aesthetics and project appearance.

Emergency Lighting

- ✓ Safe evacuation during emergencies.

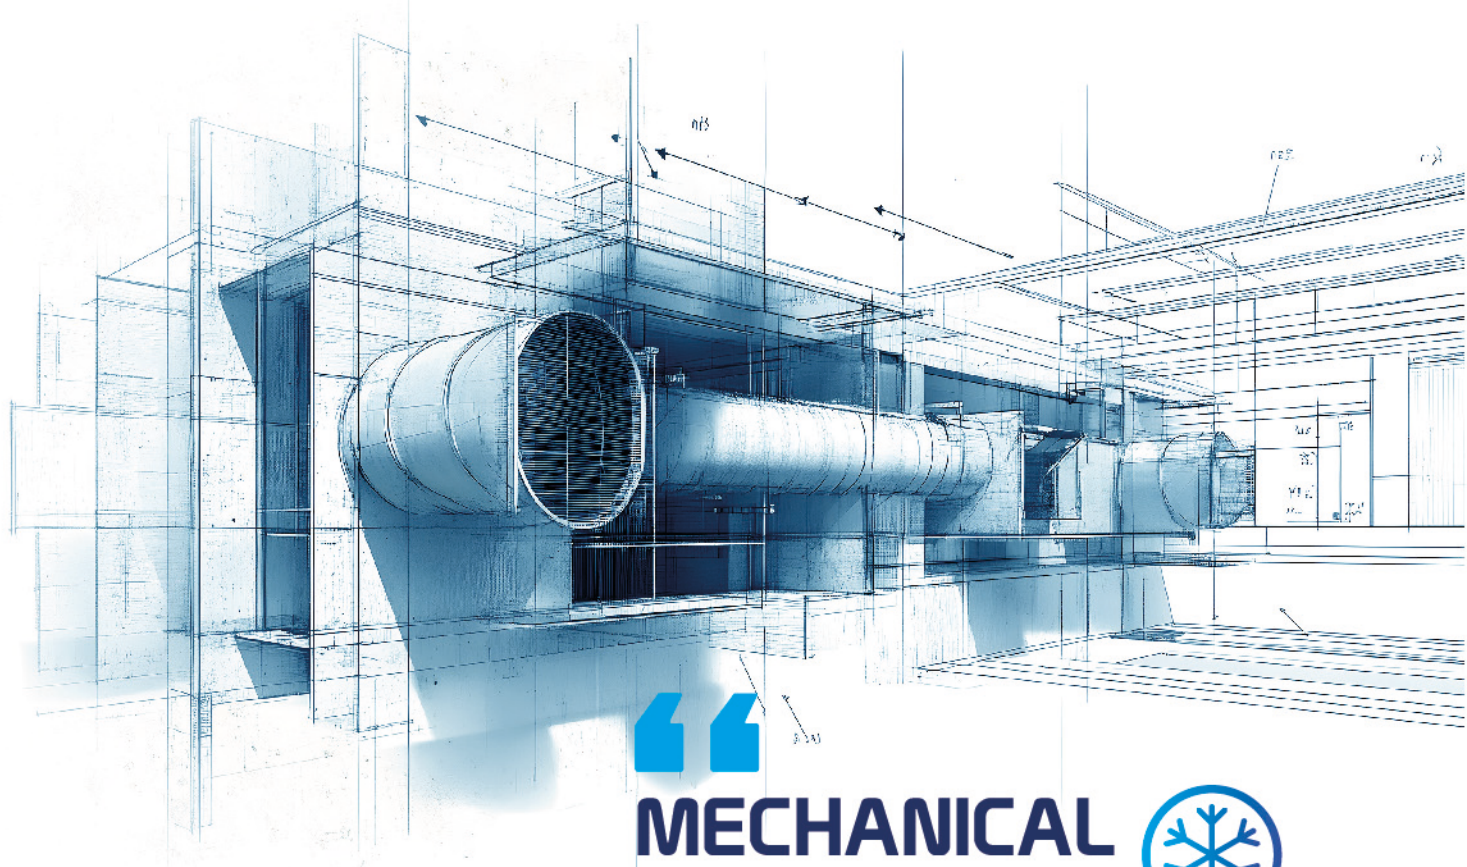

Protection Systems

Earthing Systems

- ✓ Protecting people and equipment.

Lightning Protection

- ✓ Reducing risks from lightning strikes.

MECHANICAL SYSTEMS

Advanced Mechanical Solutions

We provide complete HVAC and mechanical systems that enhance comfort, air quality and operational efficiency.

HVAC Systems

Chilled Water Systems

- ✓ Energy-efficient cooling for large facilities.

VRF Systems

- ✓ Flexible and intelligent air conditioning solutions.

Package Units

- ✓ Reliable cooling for commercial applications.

Air Handling Units

- ✓ Centralized air treatment and distribution.

Fan Coil Units

Efficient room-level climate control.

Ventilation Systems

Fresh Air Systems

Improving indoor air quality.

Exhaust Systems

Car Park Ventilation

- ✓ Maintaining healthy parking environments.

Smoke Management

Stair Pressurization

- ✓ Protecting escape routes during fire incidents.

Smoke Extraction

- ✓ Removing hazardous smoke efficiently.

Mechanical Equipment

Chillers

- ✓ High-capacity cooling systems.

Cooling Towers

- ✓ Supporting chilled water operations.

Pumps

- ✓ Reliable fluid circulation solutions.

PLUMBING SYSTEMS

Reliable Water Infrastructure

Our plumbing solutions ensure efficient water distribution, drainage and sustainability.

Water Supply Systems

Domestic Water Networks

- ✓ Reliable water delivery throughout facilities.

Booster Pump Systems

- ✓ Maintaining consistent water pressure.

Water Storage Tanks

- ✓ Secure water storage for operational continuity.

Drainage Systems

Soil & Waste Systems

- ✓ Efficient wastewater management.

Rainwater Drainage

- ✓ Protecting facilities from flooding.

Irrigation Systems

Landscape Irrigation

- ✓ Maintaining healthy outdoor environments.

Water Treatment

Filtration Systems

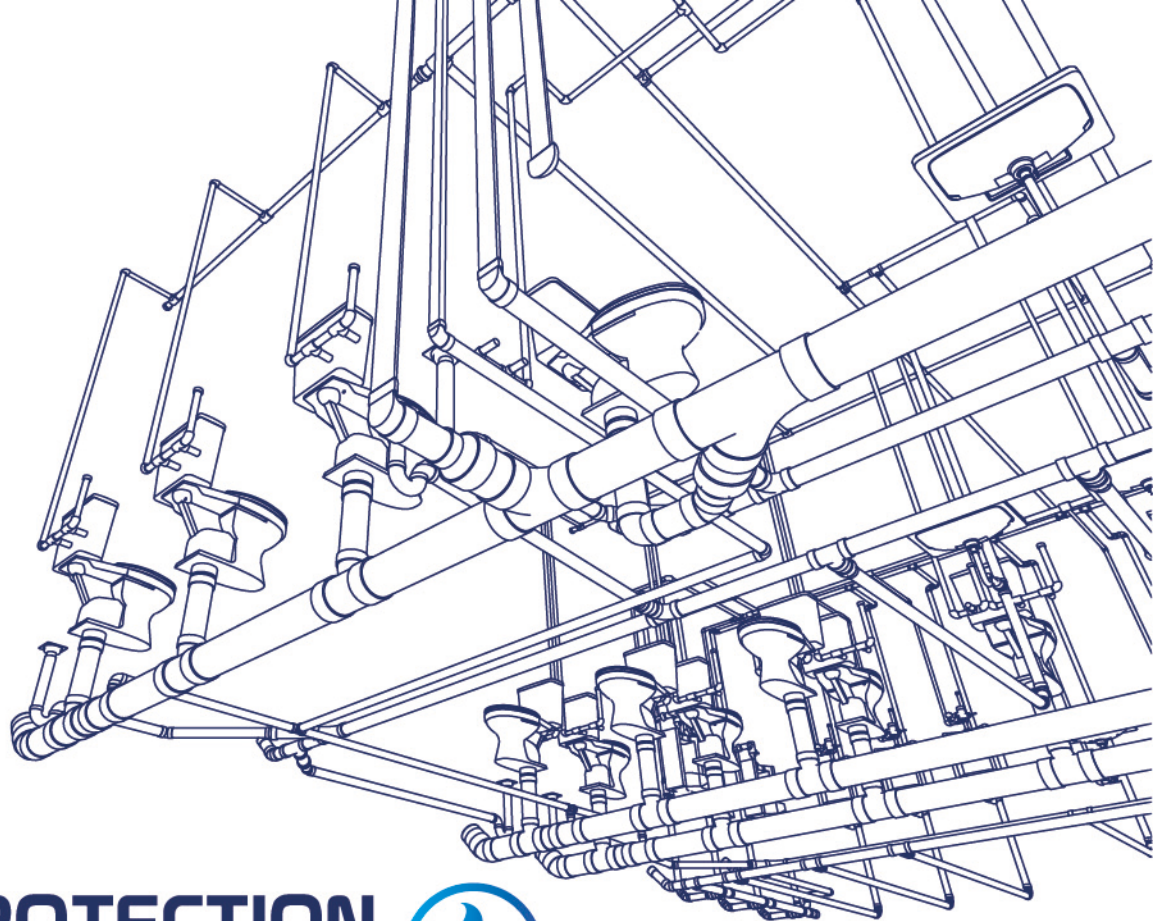

- ✓ Improving water quality.

Water Softening Systems

- ✓ Reducing scale and equipment damage.

Reverse Osmosis Systems

- ✓ Providing purified water solutions

FIRE PROTECTION SYSTEMS

Protecting People, Assets and Operations

Our fire protection systems are designed to minimize risks and maximize safety.

Fire Fighting Systems

Fire Pumps

- ✓ Reliable water supply during emergencies

Sprinkler Systems

- ✓ Automatic fire suppression.

Hose Reel Systems

- ✓ Immediate firefighting response.

Hydrant Systems

- ✓ External firefighting support.

Fire Suppression

FM200 Systems

- ✓ Protection for critical facilities and data centers.

Clean Agent Systems

- ✓ Fire suppression without equipment damage.

Fire Alarm Systems

Addressable Systems

- ✓ Accurate fire detection and monitoring.

Voice Evacuation Systems

- ✓ Safe and organized emergency evacuation.

LOW CURRENT & SECURITY SYSTEMS

Intelligent Security Solutions

Helping organizations secure people, facilities and operations.

Access Control

Card Access Systems

- ✓ Controlled facility entry.

Biometric Systems

- ✓ Enhanced security using fingerprints and facial recognition.

Public Address Systems

- ✓ **Background Music Systems**
Improving visitor experience.

- ✓ **Emergency PA Systems**
Critical communication during

Intercom Systems

Audio Intercom

- ✓ Reliable voice communication.

Video Intercom

- ✓ Enhanced communication and security.

CCTV Systems

IP Cameras

- ✓ High-definition surveillance coverage.

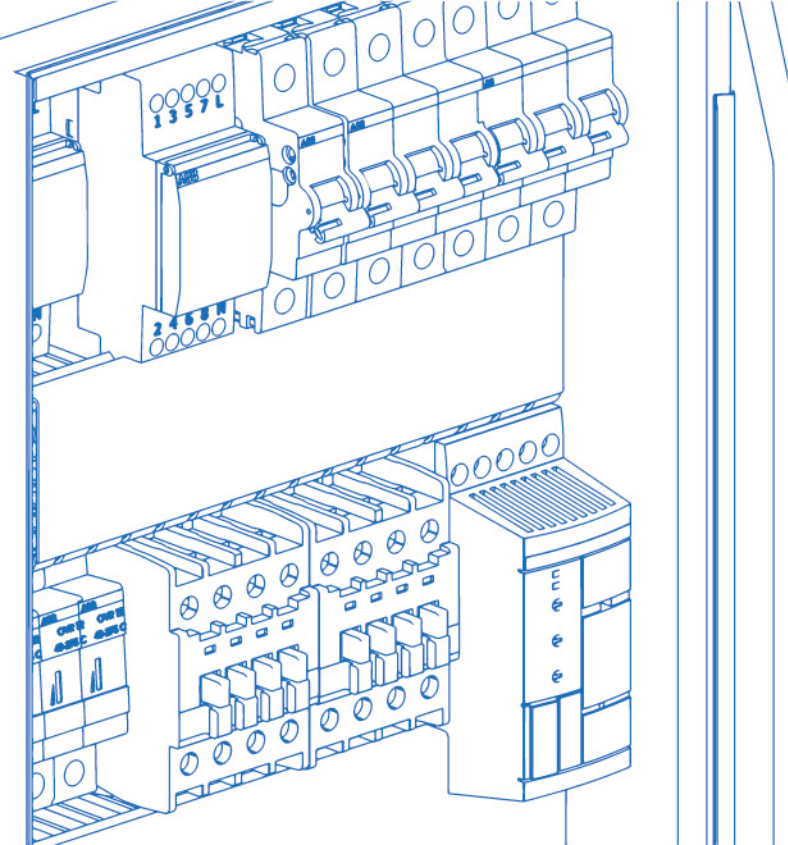

PTZ Cameras

Flexible monitoring of large areas.

Video Analytics

Smart detection and incident analysis.

ICT INFRASTRUCTURE

Building The Digital Backbone

Providing the infrastructure required for modern communication and business operations.

Structured Cabling

Copper Cabling

- ✓ Reliable network connectivity.

Fiber Optic Networks

- ✓ High-speed communication infrastructure.

Networking Solutions

LAN Networks

- ✓ Secure internal communication.

WAN Networks

- ✓ Connecting multiple locations.

WiFi Solutions

- ✓ Reliable wireless connectivity.

Data Centers

Server Rooms

- ✓ Secure IT environments.

Rack Infrastructure

- ✓ Professional equipment organization.

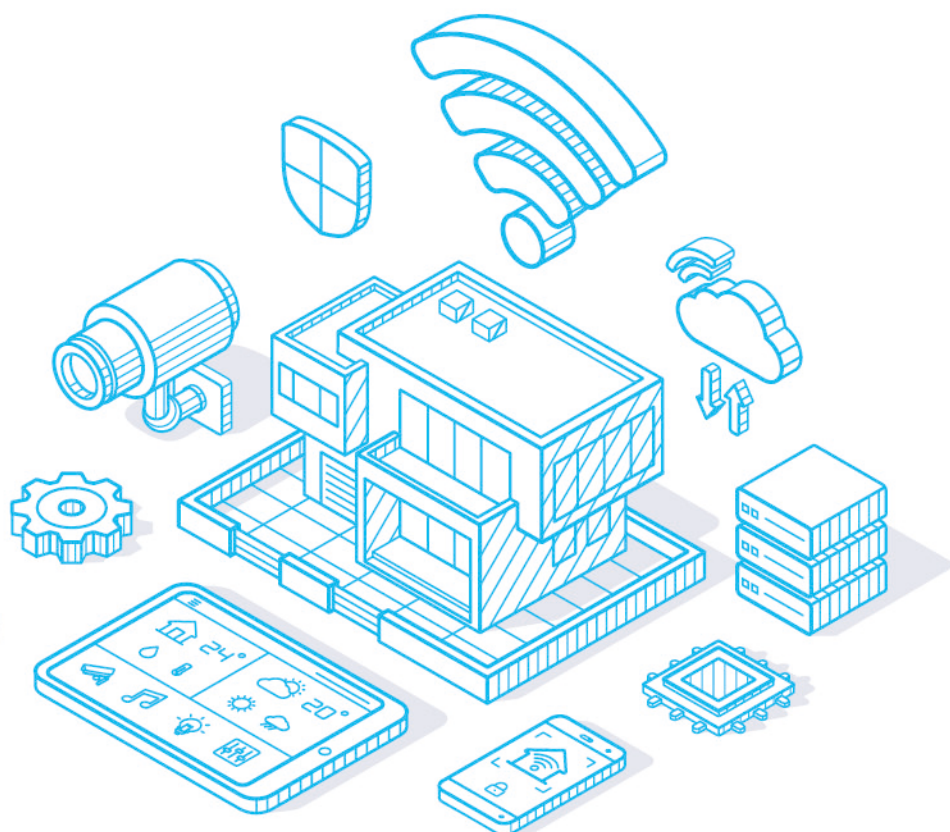

Cooling Systems

- ✓ Maintaining optimal operating conditions.

SMART BUILDINGS

Smarter Facilities. Better Performance.

Integrating technology to improve efficiency, comfort and sustainability.

Building Management Systems

HVAC Monitoring

- ✓ Optimizing climate control.

Lighting Control

- ✓ Reducing energy consumption.

Energy Monitoring

- ✓ Tracking and improving efficiency.

Smart Solutions

Smart Parking

- ✓ Improved vehicle management.

Occupancy Monitoring

- ✓ Optimizing space utilization.

IoT Integration

- ✓ Connecting systems through intelligent automation.

DIGITAL TRANSFORMATION

Technology That Drives Business Growth

Helping organizations streamline operations and improve decision-making.

RP Solutions

Finance Management

- ✓ Improved financial control.

Procurement Management

- ✓ Efficient purchasing processes.

Inventory Management

- ✓ Real-time stock visibility.

Project Management

- ✓ Better planning and execution.

CRM Solutions

Lead Management

- ✓ Improving sales performance.

Customer Service

- ✓ Enhancing customer satisfaction.

Business Automation

Workflow Automation

- ✓ Reducing manual processes.

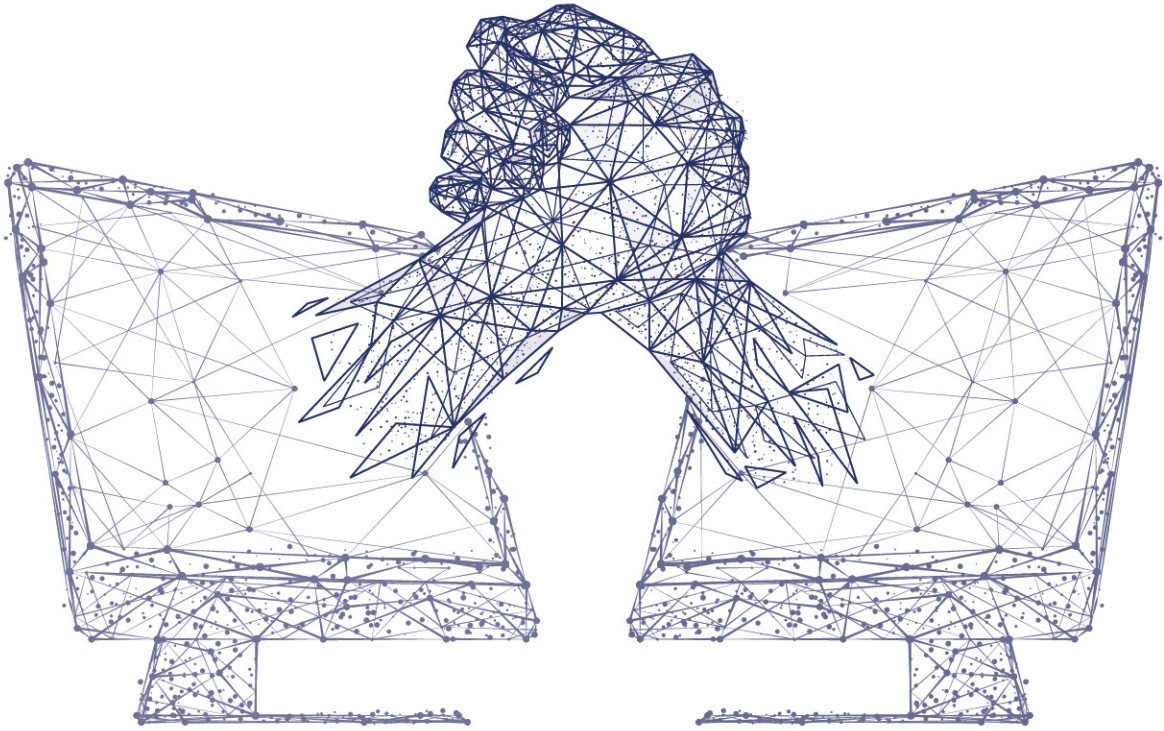

Digital Forms

- ✓ Faster information processing.

Dashboards & Reports

- ✓ Better visibility and insights.

WEB VALUE DIVISION ”

Digital Solutions Powered By Web Value

Web Value is the technology division of VIS focused on software development and digital innovation.

Services Include

Corporate Websites

Professional online presence.

Mobile Applications

Business solutions on the go.

E-Commerce Platforms

Selling products online effectively.

AI Solutions

Improving efficiency through intelligent technologies.

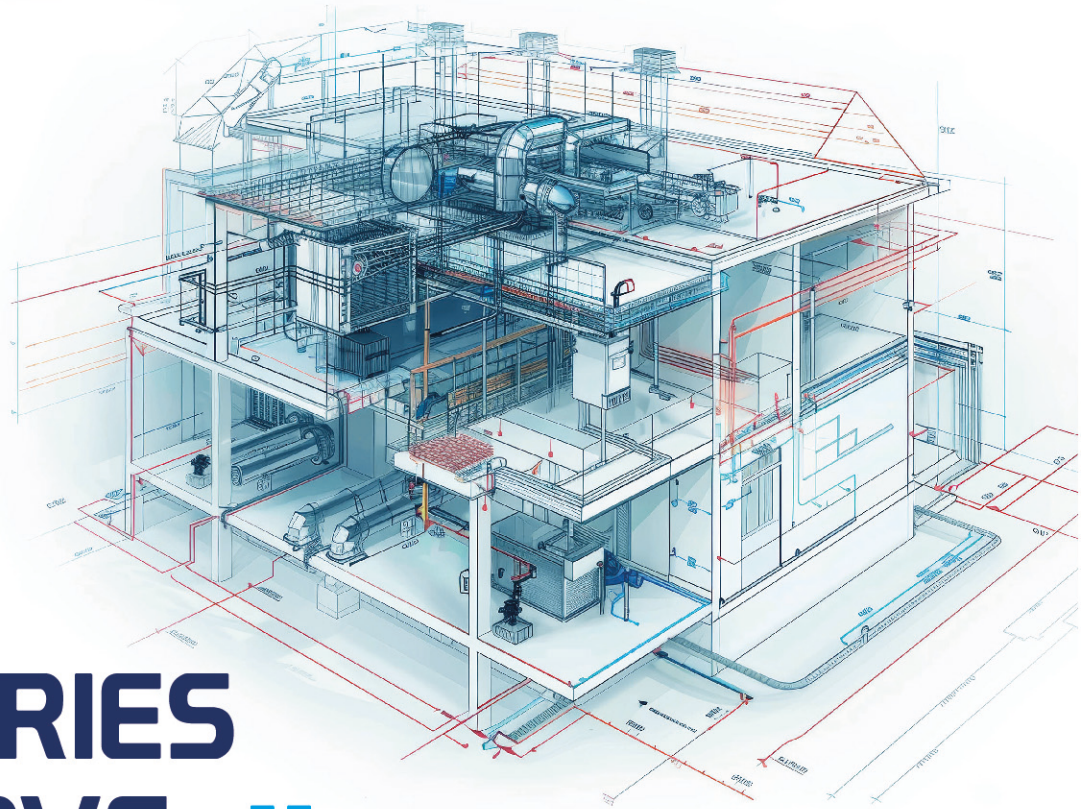

ERP Systems

Managing enterprise operations.

CRM Systems

Strengthening customer relationships.

INDUSTRIES WE SERVE ”

Delivering Solutions Across Multiple Sectors

Hospitals

Critical healthcare environments.

Hotels

Premium hospitality facilities.

Commercial Buildings

Modern business environments.

Shopping Malls

Large-scale retail developments.

Residential Compounds

Comfortable community living.

Government Facilities

Public sector infrastructure.

Educational Institutions

Learning & training environments.

Industrial Facilities

Factories & production facilities.

PROJECT DELIVERY “ APPROACH

Our Proven Methodology

- ① **Design & Planning**
Understanding project requirements.
- ② **Engineering & Coordination**
Ensuring technical accuracy.
- ③ **Procurement & Logistics**
Securing project resources.
- ④ **Installation & Execution**
Professional project implementation.
- ⑤ **Testing & Commissioning**
Verifying system performance.
- ⑥ **Handover & Support**
Ensuring successful project completion.

”

WHY VIS[”]

Why Organizations Choose us

Integrated Engineering & Technology Expertise

Comprehensive Project Delivery Capabilities

Skilled Technical Resources

Reliable Long-Term Partnerships

Quality-Focused Execution

Safety-Driven Culture

Responsive Technical Support

Commitment To Excellence

At VIS, we do not simply install systems

We create reliable infrastructure, intelligent environments and technology-driven solutions that support our clients' success for years to come.

Value Integrated
